CLASS DESCRIPTIONS

OPTIMIST – Beginner (AM, 8 - 15 yrs.)

The Beginning Optimist program is for younger sailors who are new to sailing. At the conclusion of a four-week session, the student should be able to rig an Optimist on their own, leave the dock, sail to a destination and return to the dock. The student should also be able to avoid collisions, recover their boat from capsize, know the parts of the boat, identify the wind direction and points of sail, and tie several knots including the cleat knot. The sailor will also learn how to maintain and tie down their boat. Eight weeks of instruction expands on these skills including proper sail trim and basic race course instruction.

OPTIMIST – Intermediate (AM, 8 - 15 yrs.)

At the conclusion of the Intermediate class, the Optimist sailor should build upon the 8-week Beginner Optimist class. The student will perform simple navigation, read the wind and water, and be comfortable on the water. Racing skills will be taught including the Racing Rules, the starting sequence, race course layout, and adjusting sail and boat controls for the different parts of the race course.

OPTIMIST – Advanced (PM, 10 - 15 yrs.)

The Advanced Opti Class will broaden the student's sailing knowledge with less emphasis on racing. Students will experience destination and distance sailing, develop their seamanship and safe boating skills, learn basic navigation, play on the water games, and learn basic racing and right of way Rules. They will have opportunity to join the Opti Racing Class once per week to provide them with exposure to competitive sailing. While students will primarily use their Optimist, they will have the opportunity to sail other vessels over the course of the summer including the Ideal 18, Pixel, 420 and larger keel boats.

OPTIMIST – Racing (PM, 10 - 15 yrs.)

The Racing Optimist class will focus on improving race knowledge and skills. The class will emphasize drills and higher-level race coaching. Additional instruction on the Racing Rules, boat and sail tuning, and tactics instruction will be provided. It should be emphasized that this course is for sailors who crave higher-level racing knowledge.

RS FEVA/PIXEL – (PM, 11 yrs. Novice, 12 - 18 yrs. Open)

The Feva and Pixel classes introduce two new sails, the jib and the spinnaker. The student would ideally have prior racing and sailing experience, though new sailors could crew for experienced skippers. Classes will expand on racing skills learned in the Racing Optimist class.

LASER – (PM, 14 - 18 yrs.)

Classes for older sailors spend more time on racing, boat handling, and sail trim. Classes delve deeper into tactics and race strategy, and there are plenty of opportunities to attend non-JSALIS events. Navigation and sailing skills in big boats are developed in our Big Boat program.

CLUB 420 – (PM, 14 - 18 yrs.)

Classes for older sailors spend more time on racing, boat handling, and sail trim. Classes delve deeper into tactics and race strategy, and there are plenty of opportunities to attend non-JSALIS events. Navigation and sailing skills in big boats are developed in our Big Boat program.

BIG BOAT – (after class hours, 14 - 18 yrs.)

The Big Boat Program is a separate, stand-alone class which teaches sailors navigation, seamanship, safety, and big boat racing and boat handling skills during evening and weekend practices. The class culminates in junior big boat regattas including an overnight distance race.

Fees for Junior sailing outside of regular fee structure: 2018

Peter Isler Scholarship:

- No charge for regular class fees and non member fee
- Charge for JSA fee, boat charter, damage deposit

Older sailor ala carte/not attending regular program but participating in regattas:
